SMART FACTORY
LEAN **AGILE**
COST OPTIMIZATION
RISK MANAGEMENT

The future link by link

From pandemic-driven shortages to rising commodity prices, shortage of transport capacity and talent, an energy crisis, a war in the heart of Europe, global recession, spiraling inflation, business consolidation, the automotive industry has had its fair share of changes and challenges since we last met at **AUTOMOTIVE LOGISTICS SUMMIT**

Understanding how supply chains resiliency look like in the new reality, what are the long-term changes and how companies are adapting their day-to-day operations is more important than ever. This makes the 5th edition of **AUTOMOTIVE LOGISTICS SUMMIT** a **must attend event** for the entire automotive value chain in Eastern Europe.

Together with **OEM, suppliers, logistics actors and public shareholders** we will discuss current crises, how can the industry mitigate them and, at the same time, keep an eye on the **opportunities, new trends and requirements** of a fast-paced global context.

skills for the future

CEO Talks

A sector in transition: where is the automotive industry in Eastern Europe heading?

In a special discussion panel, together with decision makers from OEM and Tier suppliers in Central and Eastern Europe we will get insights regarding current market drivers and disruptors, how to stay competitive in a fast-changing industry and how to plan long-term investments in a global context full of economic sanctions?
